

Which Water Pollutant Am I?

Use this activity as an icebreaker or classroom game.

Directions:

1. Print off enough “pollutant squares” (below) to have one for each student.
2. Tape one square to the back of each student (don’t let them see their pollutant). Other students should NOT tell them what is on their back.
3. When all students have a square, let them roam around and ask questions to determine which pollutant they have on their back.
4. Encourage them to ask questions like:
 - “Am I a point source pollutant?”
 - “Am I a non-point source pollutant?”
 - “Do I contaminate water with an oily sheen?”
 - “Do animals make this?”
5. The students must ask questions until they figure out the pollutant on their back.

Pesticides

Pet Waste

Sedimentation

Agriculture

Industry

Litter

Cigarette Butts

**Soap from washing
Cars**

Auto Fluids
