

# PLANNING AREAS

## CITYWIDE PLANNING AREAS & NEIGHBORHOOD PLANNING AREAS

### HOW DO PLANNING AREAS FIT TOGETHER?

Within each citywide planning area are a collection of smaller neighborhood planning areas, which may include several subdivisions or developments, and both residential and nonresidential land uses.

### WHY USE PLANNING AREAS?

It's impossible to meet with every neighborhood in the city. In order to facilitate an effective citywide community outreach effort, the city was divided into 12 planning areas. These are based on current development patterns, major streets, and natural features.
